Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/692,500

Applicant(s)

CARHUFF ET AL.

Examiner

Alexander Markoff

Art Unit

1792

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 April 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 23, 29-31, 34-37, 42, 47, 48, 50-58, 60-62 and 65-67 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 23, 29-31, 34-37, 42, 47-48, 50-58, 60-62 and 65-67 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 65 and 66 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The applicants previously amended the claims to recite that the sanitizing operation occurs non-concurrently with the cleaning operation and rinsing for sanitizing operations.

Such concept is not supported by the original disclosure. The original disclosure teaches the sanitizing as a part of the cleansing operation (paragraph [0016] of the specification). Further, no support for the limitation of "non-concurrently" is found in the original disclosure.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 65 and 66 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The applicants previously amended the claims to recite that the sanitizing operation occurs non-concurrently with the cleaning operation. The amendment makes the claims indefinite because it is not clear what is required by the limitation. It is noted that the original disclosure teaches the sanitizing as a part of the cleansing operation.

It appears that the applicants use non-consistent and confusing terminology.

Claim Rejections - 35 USC § 103

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

9. Claims 23, 29-31, 34-37, 42, 47-48, 50-58, 60-62 and 65-67 are rejected under 35 U.S.C. under 35 U.S.C. 103(a) as obvious over Mirabile (US Patent No 5,762,096, which incorporates US Patent No 4,527,585) in view of Barinas (US Patent No 5,329,950).

Mirabile teaches a method comprising the claimed manipulative steps except for recirculating the cleaning fluid. See entire document and incorporated patent, especially column 1 and column 4, line 20 – column 7, line 41.

Mirabile does not specifically states that cleaning is conducted several times per day. However, since Mirabile teaches conducting cleaning in off-hours and any desired or needed time it is believed that that the cleaning is conducted more than ones per day in the conventional operations.

On the other hand, it would have been obvious to an ordinary artisan at the time the invention was made to conduct the cleaning at any time when required by operation conditions recited by Mirabile, such as for example unacceptable foaming due to freezing or contamination.

Barinas teaches that it was known to recirculate cleaning fluids through food dispensers during the cleaning utilizing apparatuses connected to the dispensers.

It would have been obvious to an ordinary artisan at the time the invention was made to recirculate cleaning fluids in the method and apparatus of Mirabile as suggested by Barinas in order to reduce the use of chemicals and to achieve the benefits disclosed by Barinas.

As to claims 37, 57, 58, 60 and 61:

Mirabile modified by the teaching of Barinas teaches the claimed method except for specific recitation of velocity of cleaning fluid, temperature of water, duration of cleaning and cleaning of the milk-based food or component.

As to the temperature of water: the cited documents teach the use of hot water. The scope of the term "hot water" comprises the water of the claimed temperature. It would have been obvious to an ordinary artisan at the time the invention was made to find an optimum temperature of the hot water by routine experimentation in order to ensure the cleaning and sanitizing of the dispensers.

As to the fluid velocity and duration of cleaning:

These parameters are result effective variables. It would have been obvious to find optimum values of the result effective variables by routine experimentation in order to enhance cleaning and ensure desired level of cleaning.

As to the specific food or food component: Mirabile teaches cleaning and sanitizing of the beverage dispensers. Mirabile does not exclude any food or any dispensers.

It would have been obvious to an ordinary artisan at the time the invention was made to apply the method of Mirabile for cleaning and sanitizing any food beverage dispenser in order to keep it clean and sanitized.

Response to Arguments

10. Applicant's arguments with respect to the amended claims have been considered but are moot in view of the new ground(s) of rejection.

The applicants amend the claims to recite recirculation. The amended claims are addressed above.

Applicant's arguments filed 4/29/08 have been fully considered but they are not persuasive. The applicants argue that the rejections of claims 64 and 64 made under 35 USC 112(1 and 2) are not proper. The examiner disagrees. The original disclosure teaches the sanitizing as a part of the cleansing operation (paragraph [0016] of the specification). Further, no support for the limitation of "non-concurrently" is found in the original disclosure. Further, the claims are indefinite because it is not clear what is required by the limitation. It is again noted that the original disclosure teaches the

sanitizing as a part of the cleansing operation. It appears that the applicants use non-consistent and confusing terminology.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 571-272-1304. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571-272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
